

E-COMMERCE APP FEATURE-USER REFUND PROCESS

FEATURE NAME –user refund process

EXECUTIVE SUMMARY :

This document is prepared for the user refund process feature of the e-commerce app. The user wants to get back their money if they don't like the product or need to return the product, so to solve this problem we are going to build a new feature called "USER REFUND PROCESS".

PROJECT OBJECTIVE :

The project objective is that to increase the user trust by implementing transparency and trackable user refund process feature. Targeting reducing the user refund related complaints from ~8/week to ~4/week. This helps the business to improve their user traffic and gain good reviews from the user.

PROJECT SCOPE:

IN SCOPE:

- User refund process feature.
- Return the product.

OUT SCOPE:

- Adding the money to the ecommerce wallet account.
- Login through mail.

BUSINESS REQUIREMENTS:

Priority level	Critical level	Requirement description
